

Webbing

Weaving narrow fabrics for over 100 years, we have the technical experience to design, sample, verify, and produce webbings to meet the exacting demands of our customers. Our design engineers recommend webbing constructions and materials appropriate to meet your specific performance requirements.

Using standard materials such as nylon, polyester, or more advanced technical fibers such as Kevlar[®], Nomex[®], or Dyneema[®], we provide webbing solutions to perform the way you want.

Why Sturges?

- **Exclusive** webbings
- **Customer defined** tolerances and roll sizes
- **Managed inventory** systems to support JIT
